

NET SatisFAXtion 8.0™ Fax Server Integration with SRS Software's Freedom Chart Manager™

Give your medical staff a boost when you integrate FaxBack's award-winning network fax software with SRS' Freedom Chart Manager™. Providing flawless integration, NET SatisFAXtion 8.0 allows physician and medical offices of all sizes and specialties the ability to quickly and easily fax charts, patient records, prescriptions and more with just a few clicks from their desktop computers.

Sending a Fax From Freedom Chart Manager™

Working in concert with Freedom Chart Manager, NET SatisFAXtion 8.0 delivers prescriptions right to your patient's pharmacy, as well as other important medical documents and forms to designated recipients, instantly and securely.

Receive Incoming Faxes

NET SatisFAXtion 8.0 helps medical offices manage the flow of incoming faxes by providing a flexible, paperless solution that works directly with Freedom Chart Manager. No longer are medical staff members required to constantly monitor the fax machine for incoming faxes or spend their time tediously scanning fax documents. With NET SatisFAXtion 8.0's integration with Freedom Chart Manager, incoming fax documents are automatically stored as TIFF images or PDF documents into an SRS defined network folder.

Now medical staff members can simply click from within Freedom Chart Manager to automatically import a fax document to a patient record or they can attach a fax to be forwarded to a pharmacy to fill a prescription. Handling incoming fax documents in this fashion eliminates the burdensome task of scanning information - saving hundreds of hours of staff time and providing complete security as every incoming fax is archived for instant retrieval if needed.

SRS Software
Making the Business of Medicine More Efficient™
www.srssoft.com

Features and Benefits

- Integrates FAX messaging seamlessly with SRS Software's Freedom Chart Manager
- Physician tested and field proven in achieving paperless fax efficiencies
- Allows users to fax directly from Freedom Chart Manager
- Instantly fax medical charts, patient records, prescriptions with a click of a button
- Eliminate dependence on scanning documents, as well as reliance on fax machines and MFPs
- Provide your staff with a much faster, easier, and less expensive way to send critical medical documents
- Enables compliance with privacy acts such as HIPAA, Sarbanes-Oxley and Gramm-Leach Bliley by providing an easy and efficient means to deliver fax documents electronically
- Gives immediate notification of delivery status just as it you were standing at the fax machine but at your desktop--and without the wait
- Archive every outbound fax or have documents routed directly into your document management or workflow system
- Guaranteed fast payback and ROI for physician groups of all sizes and specialties

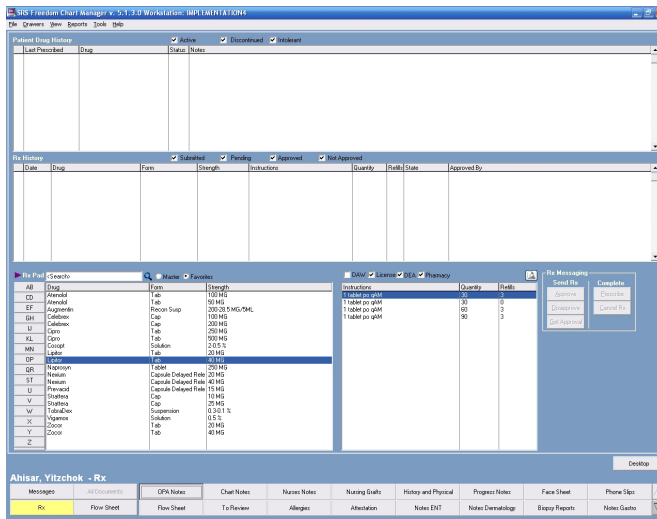

SRS® serves thousands of physicians in over 30 medical specialties nationwide. SRS software is easy to learn, easy to use, and easy to afford at a fraction of the cost, training time, and learning curve required by traditional EMRs.

NET SatisFAXtion™, by FaxBack, is used by thousands of organizations around the world. The software allows medical staff members to quickly and easily fax vital patient documents from Freedom Chart Manager.

Both SRS and FaxBack's physician adoption rates and continued use are the real measures of the software duo's success!

A Winning Combination

NET SatisFAXtion 8.0 integrates seamlessly with Freedom Chart Manager, allowing medical staff members to instantly fax patient records, medical charts, prescription requests and more.

Feature Highlights:

- Fax medical documents quickly and efficiently from SRS software to multiple recipients and receive incoming faxes to network printers and network folders
- Server-based system is easily scalable – quickly add more ports to accommodate increased fax activities
- All fax routing transactions are tracked and a time-stamped audit log is automatically created by the NET SatisFAXtion 8.0 fax server for cost tracking, recovery or proof of delivery
- Gives everyone with a networked PC in your office the ability to easily send, receive and manage faxes right from their desktops
- The most non-technical of staff members can be faxing in mere seconds and feel confident that their patient information is delivered instantaneously and securely
- Eliminate having confidential patient information pile up at the fax machine – medical staff can receive faxes directly to their email inboxes as PDF or TIFF file attachments, have faxes directed to an administrator's inbox, a network printer or even a network folder
